April 2018

Commentary

The Reserve Bank of Australia (RBA) met on 1 May 2018 and decided to leave the Official Cash Rate unchanged at 1.5%. The RBA has not changed the Official Cash Rate since the meeting held on 3 August 2016. The lower interest rate is focused on supporting the Australian Economy, as it would be consistent with sustainable growth in the economy and achieving the inflation target over time. Long term bond yields have risen over the past six months, but still remain low.

Global inflation remains low with both CPI and Inflation running below 2% due to the low growth in labour costs and strong competition in retailing. Inflation is likely to increase as the economy strengthens. The unemployment rate has declined over the past year, but has steadied at around 5.5%. Wage rates remain low, which is likely to continue, although wage growth is expected to increase with the stronger economy.

Council's portfolio once again outperformed the (BBSW) Bank Bill Swap Rate benchmark during April. It continues to be monitored closely to ensure returns are maximised as opportunities become available.

The investment returns versus the benchmark for April are:

Council portfolio current yield (including FRNs)	2.57 %
90 day Bank Bill Swap rate (Benchmark)	2.05 %
